

# EUTR DECLARATION RISK ASSESSMENT 2025

We, SWISS KRONO S.A.S., as supplier of wood based panels of your society, declare that we have implemented a Due Diligence System (DDS) in order to comply with the EU Timber Regulation (EUTR) N° 2023/1115

Our products do not include:

- Wood from non authorized cut;
- Illegally harvested wood;
- Protected or threatened wood species for which harvesting is prohibited;
- Wood harvested in violation of traditional and civil rights;
- Wood harvested in forest with High Conservation Values;
- Wood from areas where management activities have a significant impact on:
  - Sensible zones (high environmental and cultural values)
  - Natural forests
- Wood from forests in which genetically modified trees are planted.
- Wood from deforestation

Part of our DDS, we carried out a Risk Assessment which demonstrated that all our raw material come from low risk areas as detailed below. These information are checked every year with our wood suppliers:

| Product or raw material | Wood species                                                                                                 | Country of harvest | Area of harvest                                  |
|-------------------------|--------------------------------------------------------------------------------------------------------------|--------------------|--------------------------------------------------|
| Hack chips              | Spruce/ <i>Picea</i><br>Douglas/ <i>Pseudotsuga menziessii</i><br>Scotch pine/ <i>Pinus</i>                  | France             | Bourgogne/Centre/Limousin/Auvergne               |
| Sawdust                 | Spruce/ <i>Picea</i><br>Douglas/ <i>Pseudotsuga menziessii</i><br>Scotch pine/ <i>Pinus</i>                  | France             | Bourgogne/Centre/Limousin/Auvergne               |
| Round wood (softwood)   | Spruce/ <i>Picea</i><br>Douglas/ <i>Pseudotsuga menziessii</i><br>Scotch pine/ <i>Pinus</i>                  | France             | Bourgogne/Centre/Limousin/Auvergne/Pays de Loire |
| Round wood (hardwood)   | Birch/ <i>Betula</i><br>Chestnut/ <i>Castanea</i><br>Poplar/ <i>Populus</i><br>Aspen/ <i>Populus tremula</i> | France             | Bourgogne/Centre/Limousin/Pays de Loire          |
| Slabs                   | Oak/ <i>Quercus</i><br>Douglas/ <i>Pseudotsuga menziessii</i><br>Scotch pine/ <i>Pinus</i>                   | France             | Bourgogne/Centre/Auvergne/Pays de Loire          |
| Recycled wood           | Mainly softwood                                                                                              | France             |                                                  |

The raw materials purchased come from the following geographical areas. A risk assessment for each of our suppliers is carried out annually.

| Identification of the products              | Country of manufacture              |
|---------------------------------------------|-------------------------------------|
| Particleboard, Melamine faced particleboard | Switzerland, Poland                 |
| CDF                                         | Switzerland                         |
| MDF                                         | Switzerland, France                 |
| OSB                                         | Germany                             |
| OSB Ecowall                                 | Hungary                             |
| Melamine papers                             | Germany, Switzerland, Poland, Spain |
| Edgebandings                                | France                              |
| Laminates                                   | Switzerland, Poland                 |

We commit to inform you of all significant modifications concerning our wood based raw material (origin and composition):

- Country of origin non listed above;
- Chain of custody with unspecified risk.

We authorize you to make all verifications you think necessary.

Sully-sur-Loire, 08/01/2025
